He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

##### ***Input Format***

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

##### ***Output Format***

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

        int[] arr=new int[n];

        for(int i=0;i<n;i++){
            arr[i]=scanner.nextInt();
        }

        Consumer<Integer> square = x -> System.out.print((x*x)+" ");
